DETAILED ACTION

1. An Applicant's Amendment filed on September 12, 2008 has been entered. Claims 4, 5, 9, and 15 have been canceled; claims 1-3, 6, 8, 10, and 12 have been amended; and claims 17-18 have been added. Overall, claims 1-3, 6-8, 10-14, and 16-18 are pending in this application.

Election/Restrictions

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The two species are as follows: the species of Figure 4, 8, or 9 (Cooling Device) and the species of Figure 10, 11, or 13 (Heating Device).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

- Claims 1-3, 6-8, 10, 11, 17, and 18 appear to read on the species of Figure 4, 8, or 9

(Cooling Device).

- Claims 12-14 and 16 appear to read on the species of Figure 10, 11, or 13 (Heating Device).

- The following claim(s) are generic: None.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each species is mutually exclusive to a different invention, wherein:

- The species of Figure 4, 8, or 9 is drawn to an injection nozzle having a coolant loop to reduce a temperature of the nozzle.

- The species of Figure 10, 11, or 13 is drawn to an injection nozzle having a heater to increase a temperature of the nozzle.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
